Whether you are seeking to expand your agricultural operation or invest in a versatile, well-maintained farm, these properties warrant your consideration. Tract 1 features a corner-arm center pivot and a reliable water supply. Tract 2 features primarily center-pivot irrigated cropland, complemented by a small portion of gravity-irrigated ground. Much of the irrigation equipment has been updated, ensuring reliable performance throughout the growing season. Several irrigation wells have been serviced—some pulled and repaired—and an additional well was installed in recent years. Underground piping has also been added to enhance efficiency and streamline irrigation operations. For outdoor enthusiasts, Prairie Creek borders the south end of Tract 2, offering excellent habitat and strong potential for trophy whitetail hunting.

Tract 1 and Tract 2 are adjacent and can be paired, creating a seamless expansion opportunity for a larger, more efficient operation. Both properties are turn-key farms equipped with newer irrigation systems designed to support optimal productivity and long-term performance. These are quality offerings you won't want to miss!
